

WORLD'S NO.1 IS JUST ONE OF OUR STRENGTHS

With over 2.5 crore hoods sold in last 6 years, today Elica is by far the world's largest kitchenhood company.

Almost, every 3rd kitchenhood manufactured in Europe is an Elica product.

WHY ELICA

- Established in 1970 in Italy , today Elica manufactured hoods are sold in over 100 countries.
- Our EDS3 technology hoods are considered to be the "Quietest hoods in the world" .
- Our innovative 'Synairgy' motors reduce vibration & electrical consumption by 50%.
- Elica Group was nominated amongst the Top Ten Most Innovative Companies.
- Our trademark Italian designs have won several prestigious International Red Dot awards.
- Our acute business sense has earned us a listing in the Star Section of the Italian Stock Exchange.
- We are the first company to launch Split Chimneys & Multi-Flame Control Brass Burner Hobs in India.
- Range includes : Kitchenhoods, Built-in Hobs, Built-in Ovens/Microwaves, Cooking Ranges, Dishwashers, Cooktops

Elica, World's No.1 in Kitchen Chimneys Now in India. Your kitchen is the place where odors, flavors and taste mingle together with the family tradition of cooking and the pleasure of spending time together. Modernity has turned the kitchen into a place rich with significance – the centre of household affection and family ties. Kitchen is the place where you dine, entertain and spend quality time with your family. Kitchen has its own identity and personality, and the centre of kitchen is the kitchen chimney, working to remove unwanted odors and improving the quality of air. At Elica we are always working to make your kitchen a better place. Elica offers a wide range of kitchenhoods to suit individual requirement. Finish of kitchenhoods range from Stainless Steel, Glass, Crystal. All Elica Kitchenhoods are equipped with world class technologies.

Elica in India has introduced for the first time Split Chimneys with external motor technology. Since the motor is placed outside the house the noise level and maintenance is reduced. With Elica Split kitchen chimney your kitchen is free of unwanted noise and odors thus making it a perfect place to meet, entertain and dine with your loved ones. Go ahead, Turn on Silence with Elica's Split chimneys.

A large, dark, curved surface, possibly a car body panel, with a bright light source at the top and a small, glowing rectangular area in the center. The surface is highly reflective, showing highlights and shadows. The glowing area in the center is a small, rectangular, light-colored patch. The overall composition is abstract and minimalist.

Synairgy

Synairgy is the airflow system for the most efficient hoods in the world, respecting the environment by reducing electrical energy consumption by 50%. Combining in perfect synergy a silent, vibrationless, frictionless electrical machine with an intelligent electronic control which puts motor power at the service of the user, the Synairgy system is unique of its type in that it is also self-regulating. It guarantees reduced energy consumption together with an optimal level of airflow and low noise in every type of installation, adapting automatically to any difficulty presented by air passage inside the kitchen and house.

Synairgy è il sistema aspirante per cappe più efficiente al mondo, che rispetta l'ambiente riducendo del 50% il consumo di energia elettrica. Il sistema unisce in perfetta sinergia una macchina elettrica silenziosa, priva di attriti e vibrazioni, a un controllo elettronico intelligente che mette le potenzialità del motore al servizio dell'utente. Il sistema Synairgy, unico nel suo genere, è infatti in grado di autoregolarsi.

Garantisce ridotti consumi energetici, aspirazione e silenziosità ottimali in ogni condizione di installazione, perché si adatta automaticamente alle difficoltà di percorso delle condotte d'aria all'interno della cucina e dell'abitazione.

Chef Control

With Chef control, the hood no longer responds to controls, but to necessity. Whether you want to prepare a delicate steamed dish or a rich platter of mixed fried fish, all you have to do is select the cooking type on the display and Chef control translates necessity into action, automatically setting the most appropriate airflow power. In addition, special functions Silent and Booster are available to immediately satisfy the most common requirements: maximum silence for non-invasive operating or maximum power to deal with high-intensity fumes or vapour. Chef control revolutionises the dialogue between cook & cooker hood.

Con Chef Control la cappa non risponde più ai comandi perché si adatta ai bisogni. Una delicata cottura al vapore o una frittura mista? È sufficiente scegliere la cottura sul display e Chef Control traduce le necessità in comandi, impostando automaticamente l'aspirazione ottimale. In più, le funzioni speciali Silent e Booster soddisfano immediatamente le richieste più comuni: massima silenziosità per un funzionamento non invasivo o massima potenza per aspirare fumi o vapori di particolare intensità. Chef Control rivoluziona il dialogo tra il cuoco e la cappa.

Led Light

These hoods are equipped with a lighting system based on LED (Light Emitting Diode) technology, guaranteeing high quality cooktop illumination that makes the cooking process as easy as possible. In addition, they last ten times longer than traditional bulbs and provide an electrical energy saving of 90%.

Queste cappe sono dotate di sistemi di illuminazione basati sulla tecnologia LED (Light Emitting Diode). I LED garantiscono una illuminazione ottimale del piano cottura per agevolare la preparazione dei cibi. Inoltre, hanno una durata fino a 10 volte maggiore delle lampade tradizionali e consentono di risparmiare il 90% di energia elettrica.

High Performance

Models with extremely high airflow performance levels specifically aimed at large kitchen environments or for culinary habits that require a great deal of boiling, grilling and frying.

Modelli dalle performance di aspirazione molto elevate, particolarmente indicati per grandi ambienti cucina o per abitudini culinarie che richiedono intense bolliture, frittiture, grigliature.

Perimeter aspiration

Perimeter airflow is an alternative form of air-treatment technology where the airflow occurs around the outer edge of the cooker hood, reducing energy consumption and noise. In place of the original visible filter, these products feature a steel or glass panel, enhancing the look and simplifying the cleaning and maintenance of the product.

L'aspirazione perimetrale è una tecnologia di aspirazione alternativa, dove il flusso dell'aria viene fatto confluire sul perimetro esterno della cappa, riducendo consumo energetico e rumore. cappa, riducendo consumo energetico e rumore. Al posto del tradizionale filtro a vista, su questi prodotti è presente un pannello in acciaio o vetro che migliora l'estetica e semplifica le operazioni di pulizia e manutenzione.

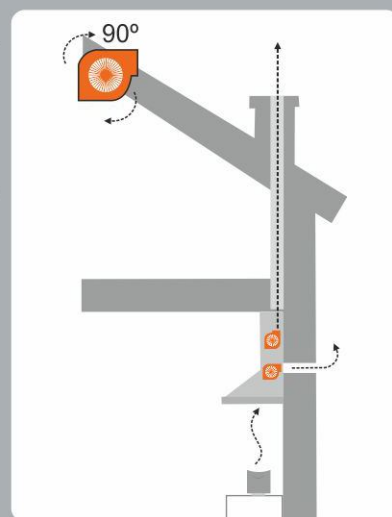

54>55

Back aspiration

These hoods have air outlets at the top and on the back. The air outlet can be configured according to need during installation by simply rotating the internal motor unit 90 degrees. The classic top outlet is recommended for both the filter function and for extraction through an exposed exhaust duct. The new rear outlet instead allows the extraction function to be used without an exposed duct. In this case, the hood must be connected to an extraction duct built into the wall on which the hood is installed.

Queste cappe hanno l'uscita dell'aria sia nella parte superiore che nella parte posteriore. In fase di installazione è possibile configurare l'uscita dell'aria a seconda delle esigenze, con una semplice rotazione di 90° del gruppo motore interno. La classica uscita superiore è indicata sia per il funzionamento in filtrante che per il funzionamento in aspirante con camino a vista. L'innovativa uscita posteriore permette invece il funzionamento in aspirante senza la necessità di un camino a vista. In questo caso la cappa dovrà essere collegata a un condotto di evacuazione dei fumi predisposto all'interno del muro su cui la cappa stessa verrà installata.

Elica Deep Silence

The hoods equipped with the Elica Deep Silence (EDS3) system are the quietest in the world. The technology employed allows the hood to function with the lowest level of noise possible – in fact, at low speeds, there is no perceptible noise at all. This reduction in domestic noise pollution of more than 35% with respect to traditional cooker hoods is rather like comparing a bustling office environment where everyone is talking at once with one or two people chatting quietly in a library. While noise level is reduced, airflow performance remains unaffected: in fact, the hoods that come with EDS3 are amongst the most powerful and efficient available on the market. EDS3 is an exclusive Elica patent.

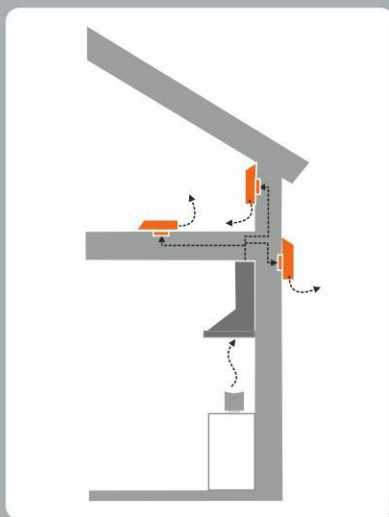

Le cappe equipaggiate con il sistema Elica Deep Silence (EDS3) sono le più silenziose al mondo. La tecnologia impiegata permette una funzionalità estremamente silenziosa, addirittura impercettibile alle basse velocità, con una riduzione di inquinamento acustico ambientale di oltre il 35% rispetto alle cappe tradizionali. La riduzione del sonoro non pregiudica le prestazioni di aspirazione: le cappe dotate del sistema sono anche tra le più potenti ed efficienti disponibili sul mercato. EDS3 è un brevetto esclusivo Elica.

External motor

These hoods can be equipped with an external motor system, where the motor is installed outside the kitchen environment or even outside the house itself. Compared to the same model with an internal motor, the external motor improves airflow performance by 35% and reduces perceived noise level by 20%.

Queste cappe possono essere dotate di un sistema motore remoto, installabile all'esterno dell'ambiente cucina o anche all'esterno dell'abitazione. Rispetto allo stesso modello con motore interno, il motore esterno migliora del 35% le performance di aspirazione e riduce del 20% il livello sonoro percepito.

Exclusive material

These products display Elica's ongoing research into beauty and functionality through the choice of cutting edge forms and materials. Each hood is unique in its own way: technopolymer surfaces, sophisticated polished steel, metallic mesh and visible microperforated steel filters. Materials that surprise and delight every one of our senses, combined with impeccable performance and functionality.

La continua ricerca Elica su funzionalità e bellezza si esprime, in questi prodotti, nella scelta di forme e materiali d'avanguardia. Ogni cappa è unica nel suo genere. Anche i meccanismi di funzionamento si vestono di qualità estetica, come i filtri a vista in acciaio microforato. Design e materiali sorprendenti per tutti i sensi, uniti a performance e funzionalità impeccabili.

Evolution

Products developed around the Evolution system, which has revolutionised the world of kitchen ventilation. Airflow system, grease and odour filters and lighting (for the cooktop, and, in some versions, for the surrounding area in the kitchen) are all packed into a compact steel cylinder. Evolution hoods are light and elegant design objects that integrate smoothly with the most sophisticated environment. Evolution is an exclusive Elica patent.

Prodotti sviluppati attorno al sistema Evolution, che ha rivoluzionato il mondo della ventilazione in cucina. Un compatto cilindro in acciaio inox contiene le funzioni di aspirazione, filtraggio grassi e odori, illuminazione del piano cottura nonché, in alcune versioni, dell'ambiente cucina. Le cappe Evolution sono oggetti di design leggeri ed eleganti, che si integrano con naturalezza negli ambienti più raffinati. Evolution è un brevetto esclusivo Elica.

Ambient light

We need light to see, to play, to cook, to live. All Elica hoods provide high quality lighting for the cooktop. In addition, hoods equipped with Ambient Light also spread light into the surrounding area. An extra light source to illuminate and animate your kitchen.

L'illuminazione è la condizione per vedere, giocare, cucinare, vivere. Se tutte le cappe Elica illuminano efficacemente il piano di lavoro, quelle dotate di Ambient Light diffondono luce anche nell'ambiente circostante. Una vantaggiosa opzione per disporre di un punto luce in più che illumina e arreda la cucina.

56>57

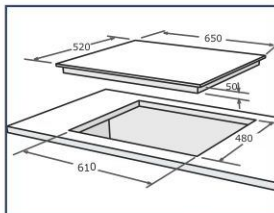

Head Saver

The Head Saver hoods are the result of ergonomic and usability research into the product. Their smaller size facilitates movement around the cooktop and means the cook can work without having to worry about sudden bumps.

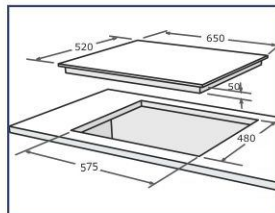

Le cappe Head Saver sono il frutto di studi di ergonomia e usabilità del prodotto. La loro ridotta dimensione favorisce una maggiore libertà di movimento nella preparazione dei cibi e permette di vivere la cucina senza timore di urti involontari.
